

The Energy Generation Program

Life Is On

Schneider
Electric

*The **Energy Generation Program** lets fresh graduates develop in-demand skills to make an impact on the future of energy. The selected recruits are passionate individuals who share our belief that access to energy is a basic human right. Join the Energy Generation Program.*

Program Objectives

We believe access to Energy is a basic human right. Our ultimate goal through this program is to **nurture a new generation who is passionate, open to challenges and committed** to innovative solutions that address the energy paradox: balancing our planet's carbon footprint and the undisputable right of everyone to quality energy. The **Energy Generation Program (EGP)** is an exciting opportunity that aims to build a pipeline of highly skilled Young Talents to deliver the short-term and long-term vision of Schneider Electric.

It is designed to provide professional training courses and hands-on experience in various functions that an executive has to closely deal with in his/her daily management and at the same time bring it to life via specific project assigned in the chosen field.

Key Program Activities

- The Energy Generation Program provides minimum **meaningful job rotations** and a **structured learning path** focusing on commercial, engineering, supply chain as well as critical cross function skills.

The Energy Generation Program 2018 – 2019 is focusing on particular following roles: **EGP Global Supply Chain**, focusing on (2 position)

- Method
- Quality

- The Energy Generation Program also offers a **18 – 24 months full of unique exposure** like mentoring and coaching; community of practice; sessions with inspiring leaders as well as cross country/function experience through at least **1 project or short term overseas experience**.

- This program will provide you an opportunity to **accelerate the career development** within Schneider Electric worldwide.
